

# Endpoint Security Essentials – Introduction

## Self-Paced Online Training

### Highlights

#### Duration

1-hour

#### Who Should Attend

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with system endpoint security.

#### Prerequisites

Students taking this course should have a working knowledge of Windows operating systems, system administration, and network technologies. Basic understanding of computer security, command line syntax, malware/anti-malware, virus/anti-virus, and web technologies is recommended. Prior experience or working knowledge of ePolicy Orchestrator is also required.

#### How to Register

This course is available for purchase at <https://trellix-training.netexam.com>

This course provides an in-depth solution overview and guide for planning a successful Trellix Endpoint Security (ENS) deployment in your environment. Endpoint Security combines the Threat Prevention, Adaptive Threat Protection, Firewall, and Web Control modules to take immediate action against potentially dangerous applications, downloads, websites, and files. This course is designed as a practical starting point for someone who is new to supporting Endpoint Security

### Learning Objectives

- Identify the components of the Endpoint Security product
- Plan an Endpoint Security deployment

### Agenda at a Glance

1. Introduction
2. ENS Solution Overview
3. Planning the Deployment
4. Conclusion
