Endpoint Security Essentials
Self-Paced Online Training

Highlights

Duration

4-hours

Who Should Attend

This course is intended for system and network administrators, security personnel, auditors, and/ or consultants concerned with network and system security.

Prerequisites

Students taking this course should have a working knowledge of Windows operating systems, system administration, and network technologies. Basic understanding of computer security, command line syntax, malware/anti-malware, virus/ anti-virus, and web technologies is recommended. Prior experience or working knowledge of ePolicy Orchestrator is also required.

How to Register

This course is available for purchase at https://trellix-training.netexam.com

This course provides an in-depth introduction to the tasks required to install, deploy, and manage Trellix Endpoint Security (ENS). Endpoint Security combines the Threat Prevention, Adaptive Threat Protection, Firewall, and Web Control modules to take immediate action against potentially dangerous applications, downloads, websites, and files. This course is designed as a practical starting point for someone who is new to supporting Endpoint Security.

Learning Objectives

- Identify the components of the Endpoint Security product
- Plan an Endpoint Security deployment
- Install the required software packages and extensions on ePolicy Orchestrator
- Deploy the ENS client to ePO managed endpoint systems
- Use the ENS client to configure and manage options on a self-managed endpoint system
- Understand the ENS modules and use the ENS policies on the ePO
- Monitor and report on security status using ePO dashboards, reports, and logs

Agenda at a Glance

1. Introduction
2. ENS Solution Overview
3. Planning the Deployment
4. Installing the ENS Packages and Extensions
5. Deploying the ENS Client to the Endpoint Systems
6. Using the Endpoint Security Client
7. Introduction to the ENS Modules
8. Monitoring and Reporting
9. Conclusion
