

# File and Removable Media Protection Essentials - Deployment

## Self-Paced Online Training

### Highlights

#### Duration

1 hour

#### Prerequisites

Students taking this course should have a working knowledge of Windows and macOS, along with familiarity with system administration and network technologies.

Recommended prerequisites include a basic understanding of computer security, data encryption principles, and command line syntax, as well as knowledge of malware, antimalware, viruses, antivirus, and web technologies. Additionally, prior experience or working knowledge of Trellix ePolicy Orchestrator (ePO) and Trellix Agent is also required.

#### How to Register

This course is available for purchase at <https://training-portal.trellix.com>.

The File and Removable Media Protection Essentials - Deployment course provides an in-depth overview of the installation and upgrade of Trellix File and Removable Media Protection Essentials (FRP) 5.4.4 in your environment.

FRP delivers policy-enforced, automatic, and transparent encryption of files and folders stored or shared on PCs, file servers, removable media such as USB drives, CDs/DVDs, and ISO files, cloud storage services, and emails. This course is designed as a practical starting point for someone who is new to deploying FRP.

### Learning Objectives

After completing this course, learners should be able to:

- Describe FRP installation methods.
- Add FRP Extension and Client packages on ePO.
- Deploy FRP Client software on endpoints.
- Upgrade FRP from the Software Catalog.
- Upgrade FRP manually.

### Who Should Attend

The course is designed for system and network administrators, security personnel, auditors, and consultants who are concerned with data encryption on endpoints.

If you are new to FRP deployment concepts or looking to enhance your deployment skills, this course is tailored to meet your learning needs.

### Course Outline

1. Introduction
2. Installation and Deployment
3. Upgrade
4. Conclusion
