Trellix EDUCATION SERVICES

Trellix® Insights Essentials: Introduction

Self-Paced Online Training

Highlights

Duration

60 minutes

Prerequisites

Students taking this course should have a working knowledge of Microsoft Windows administration, system administration concepts, and a basic understanding of computer security and internet services. It is also necessary to have prior experience using Windows CLI commands and ePolicy Orchestrator.

How to Register

Here is the Academy Course link. Click Enroll to sign up.

This introductory course provides a practical overview of Trellix Insights, detailing its primary functions, key features, business value, and core components while explaining the system architecture and component functions. Participants will gain the skills to log in and navigate the Web Console, interpret the Dashboard for high-level security overviews, understand the Security Posture Score calculation, and identify supported third-party integrations.

Learning Objectives

After completing this course, learners should be able to:

- Describe the primary functions, key features, and business value of the solution.
- Define Trellix Insights components.
- Log in to and navigate the main areas of the Web Console.
- Interpret the Dashboard for a high-level security overview.
- Explain the Security Posture Score's calculation and key factors.
- Describe the system architecture and core component functions.
- Identify supported third-party integrations and their benefits.

Who Should Attend

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with system endpoint security.
