

# Insights Essentials

## Self-Paced Online Training

### Highlights

#### Duration

3-hours

#### Who Should Attend

This course is intended for security analysts and/or engineers responsible for configuration, management, and monitoring activity on company systems, networks, databases, and applications using Insights.

#### Prerequisites

Students taking this course should have a working knowledge of Microsoft Windows and Windows system administration, network technologies, computer security, cloud security concepts, and web technologies. It is also necessary to have prior experience using Trellix ePolicy Orchestrator and Endpoint Security software.

#### How to Register

This course is available for purchase at <https://trellix-training.netexam.com>

This course provides instruction on the design, setup, configuration, and management of the Trellix Insights application. In addition, students will learn how to effectively leverage Insights in their environment.

### Learning Objectives

- Identify Insights capabilities
- Define Insights components
- Describe how Insights helps the security operations center (SOC) mission
- Describe the product/solution architecture
- Identify product/solution communication paths and ports
- Configure users onboarding settings
- Check in the required product extensions
- Create and authenticate account
- Recall Insights dashboards and their purposes
- Collect HAR files for troubleshooting purposes

### Course Outline

1. Course Introduction
2. Product Introduction
3. Installation
4. Using the Product
5. Conclusion
