

Investigations with Email Security – Cloud

Instructor-Led Training

Highlights

Duration

1 day

Prerequisites

Students taking this course should have a working understanding of networking, email security, and email support.

How to Register

This course is available for purchase at <https://trellix-training.netexam.com>.

Private sessions are available. For further details and pricing, please contact your Trellix account representative.

Instructor-led sessions are typically a blend of lecture and hands-on lab activities. To view our full course catalog, please visit <https://trellix-training.netexam.com>.

This course provides an overview of Trellix Email Security – Cloud core functionality and covers administration procedures and alert analysis.

Hands-on activities include rule/policy creation, alert generation, and the breakdown and analysis of information found in a Trellix email alert that is used in incident reporting

Learning Objectives

After completing this course, learners should be able to:

- Describe how Email Security detects and protects against malware
- Demonstrate knowledge of the email analysis process
- Configure Email Security settings, policies, and notifications
- Describe the various queues used for email management and processing
- Identify alerts correlated with Network Security with and without Central Management
- Find critical alert information on the dashboard
- Access and manage alerts and quarantined emails
- Examine OS and file changes in alert details to identify malware behaviors and triage alerts

Who Should Attend

This course is intended for analysts (primary) and administrators responsible for the setup and management of Email Security – Cloud and use Email Security – Cloud to detect, investigate, and prevent cyber threats..

Course Outline

1. Email Threats and Detection Engines

- Email Security internal flow
- Malicious email campaigns
- Email threats
- Email hunting

2. Email Security Cloud Alerts

- Email alerts summary and message details
- Quarantine
- Malware objects
- Email trace
- Email executive summary report
