

# Intelligent Virtual Execution - Cloud (IVX Cloud) Essentials: Integration

## Self-Paced Online Training

### Highlights

#### **Duration**

30 minutes

#### **Prerequisites**

Learners should have a basic understanding of network security concepts and file system administration. Familiarity with security operations such as threat detection, malware/anti-malware, and URL analysis is recommended. Additionally, learners should have experience with web-based applications and cloud technologies. Prior exposure to API integrations and virtual environments is beneficial but not required for this course.

#### **How to Register**

This course is available for purchase at <https://training-catalog.trellix.com/>.

This course provides a comprehensive overview of Trellix® Intelligent Virtual Execution - Cloud (IVX - Cloud) Integrations. This provides information on IVX configuration and management, along with third-party and Trellix product integrations.

### **Learning Objectives**

After completing this course, learners should be able to:

- Integrate various third-party cloud tools with IVX - Cloud.
- Integrate Trellix products with IVX - Cloud.
- Configure and integrate Box with IVX - Cloud.
- Configure and integrate Amazon S3 with IVX - Cloud.
- Configure and integrate Trellix Insights with IVX - Cloud.

### **Who Should Attend**

This course is intended for security analysts, system administrators, IT professionals, and security personnel responsible for managing and maintaining cloud-based threat detection systems. It is also beneficial for those involved in cybersecurity operations, such as monitoring alerts, analyzing threats, and configuring security policies in their organizations.

## Course Outline

- Introduction
- IVX - Cloud Integrations
  - Module Introduction
  - Integrations Overview
  - Integrations with Trellix Solutions
  - Integrations with Third-Party Applications
  - Module Summary
- Conclusion
