

Intelligent Virtual Execution - Server Essentials: Introduction

Self-Paced Online Training

Highlights

Duration

45 mins

Prerequisites

Students taking this course should have a basic understanding of network security concepts and system administration. Familiarity with security operations such as threat detection, virus/anti-virus, and malware analysis is recommended. Additionally, experience with web-based and command-line interfaces is beneficial.

How to Register

This course is available for purchase at <https://trellix-training.netexam.com>.

This entry-level course provides a comprehensive overview of Intelligent Virtual Execution - Server (IVX - Server). You will learn its key features, benefits, capabilities, its various user interfaces, integration with Central Management, and an overview of IVX clusters.

Learning Objectives

After completing this course, learners should be able to:

- Explain the key features and benefits of IVX - Server.
- Describe the capabilities of IVX - Server and its various user interfaces.
- Navigate the IVX - Server dashboard, alerts, and submissions pages, and understand their purpose.
- Integrate IVX with Central Management (CM).
- Manage IVX - Server users and roles from the CM web interface.
- Explain the architecture of IVX clusters and their functions.

Who Should Attend

This course is intended for security analysts, system administrators, IT professionals, and security personnel responsible for managing and maintaining threat detection systems. It is also beneficial for those involved in cybersecurity operations, such as monitoring alerts and analyzing threats.

Course Outline

1. Introduction
2. Product Overview
3. User Interfaces
4. Fundamentals
5. Conclusion
