

DATA SHEET

Incident Response Readiness Assessment

Because the Worst Day Shouldn't Be Your First Test

Benefits

- Identify IR gaps before they are exploited
- Strengthen response playbooks, roles, and escalation paths. Improve detection and triage capabilities
- Aligns with NIST 800-61r2/3, MITRE ATT&CK®, ISO 27035, and regulatory mandates
- Provides a maturity roadmap for building or evolving a resilient IR capability.
- Increases executive and team-level confidence to act under pressure.

Deliverables

- Incident Response Readiness Assessment Report
- Executive Summary with Readiness Score
- Gap Analysis and Maturity Level Mapping
- Recommended IR Improvement Roadmap

Optional Add-on:

- Simulated scenarios to test team readiness
- IR Plan & Playbook Development: Based on observed gaps.

Overview

In today's cybersecurity landscape, a mature and proactive Incident Response (IR) program is essential to protect against, detect, and respond to modern cyber threats. Trellix Guardians' Incident Response Readiness Assessment is a proactive, consultative engagement designed to evaluate the preparedness of your people, processes, and technologies to handle real-world security incidents. This assessment helps identify and remediate weaknesses before an incident occurs, ensuring swift, coordinated, and effective response.

Our Methodology

Our Guardians assessment is tailored to your organization's size, industry, and regulatory needs. It includes structured interviews, documentation reviews, and testing against key readiness criteria. We assess the following domains:

- Governance & Oversight (IR policies, legal, executive involvement)
- Communication & Coordination (roles, escalation, external notification)
- IR Plan Development & Maintenance (playbooks, procedures)
- Threat Detection & Analysis (monitoring, alerting, threat intel usage)
- Incident Containment, Eradication & Recovery (technical controls, isolation procedures)
- Lessons Learned & Reporting (after-action reviews, documentation)
- Tabletop Exercises & Testing (frequency, realism, stakeholder involvement)
