Aviso de Trellix SNS: Rebranding de Trellix Solutions - Enviado el 11 de abril de 2022

A medida que Trellix continúe nuestra emocionante evolución, nuestros clientes comenzarán a ver nuestras soluciones reflejando nuestro nuevo nombre y marca. Queremos dar a conocer este cambio de marca para que las organizaciones puedan notificar a los usuarios de la solución y la plataforma en consecuencia. También queremos asegurarnos de que nuestros clientes puedan estar tranquilos sabiendo que estos son cambios programados e implementados por Trellix directamente.

Trellix KB95499: Cambio de marca de las soluciones Trellix - Publicado el 11 de abril de 2022

¿Qué puede incluir el rebranding?

Logotipo de Trellix actualizado

Nombre actualizado de Trellix

Nombres de productos actualizados

Combinación de colores de la marca Trellix actualizada

Actualización de los dominios, direcciones IP y rangos de IP y certificados de Trellix

Por favor, suscríbase a KB95499 – Trellix solutions rebranding para conocer el último estado de nuestros esfuerzos de rebranding y las continuas actualizaciones.

NOTA:

Este artículo sólo está disponible para los usuarios registrados de Service Portal. Para ver el artículo, haga clic en el enlace del artículo e inicie sesión cuando se le solicite.

Trellix KB95499: Trellix solutions rebranding – Published 11 April 2022

5. [KB95499 - Trellix solutions rebranding](#)

¿Que implica el cambio de la marca de Trellix?

Actualización de los nombre de los productos

Actualización del nombre y el logotipo de Trellix.

Actualización de la combinación de colores de la marca Trellix

Certificados actualizados (incluyendo las Autoridades Certificadoras Raíz e Intermediarias)

Actualización de los dominios de Trellix, de las direcciones y rangos de IP

Actualización Trellix EULA (End User License Agreement)

Actualización Trellix Copyright

Multi-Vector Virtual Execution (MVX)	Soon
Virtual Execution (VX)	Soon
Investigation Analysis (IA)	ETA Beginning of Q3 (2.0.0 release)
Packet Capture (PX)	ETA Beginning of Q3 (6.0.0 release)
Redline	Soon
Security Orchestrator	Soon
Cloudvisory	Updated with Trellix name and logo (from 5.2 release)

A

¿Por que es importante este cambio?

El cambio de marca tiene un impacto en el cliente y requiere una acción por parte de éste.

El impacto puede incluir:

Ver cambios en los iconos de las soluciones desplegadas en los sistemas

Interrupción de la funcionalidad de la solución si no se implementan las acciones requeridas por el cliente

P.D. ¡Por clientes, también nos referimos a los socios! Los socios MSP (Managed Service Provider) / MDR (Managed Detection and Response) / revendedores tendrán que realizar cambios para mantener la funcionalidad de los entornos de producción y de demostración.

¿Cuándo ocurrirá esto?

Trellix tiene requisitos para aplicar los cambios antes del 31 de diciembre de 2022.

¿Cuándo estarán disponibles los nuevos certificados, URLs, FQDNs, IPs?

- ¡Ahora!
- Suscríbase a KB95499 - Cambio de marca de las soluciones Trellix para recibir actualizaciones continuas a medida que estén disponibles
- Planifique la implementación de estos cambios antes de desplegar las versiones de la solución que los han adoptado. Estos cambios deberían realizarse a finales del tercer trimestre y a principios del cuarto trimestre de 2022

¿Cuándo adoptarán las soluciones estos nuevos certificados, URLs, FQDNs e IPs?

- **A finales del tercer trimestre y a lo largo del cuarto trimestre de 2022**
 - Algunas soluciones pueden tener revisiones críticas, RTS, EA o versiones GA que deben producirse antes de la semana del 26 de septiembre de 2022. Las notas de la versión para estas versiones detallarán si estos cambios ya han sido adoptados en esa versión.

¿Que tengo que cambiar?

Ejemplo – FQDN / URL Changes:

- gti.mcafee.com se transforma a gti.trellix.com
- ¿Tiene reglas de firewall o proxy para permitir la comunicación de sus sistemas con gti.mcafee.com?
- ¿Si? Por favor, actualice esas reglas para añadir y/o sustituir gti.trellix.com
 - La adición/eliminación depende de la orientación en [KB95499 - Trellix solutions rebranding](#)
- Cuando esté disponible, despliegue la versión de la solución que haya adoptado estos cambios antes del 31 de diciembre de 2022
- **IMPORTANTE: ¡Asegúrese de implementar todos los cambios de Certificados, FQDN, URL e IP antes de adoptar las versiones de la solución que aprovechan estos cambios!**

ePolicy Orchestrator URL changes

El propósito de este artículo es resumir algunos de los próximos cambios en las URL que utiliza ePO on-premises. Todas las referencias futuras a ePO on-premises en este artículo se acortarán a ePO.

The following URLs that ePO uses will be moving to URLs on the Trellix domain:

Old URL	New URL	New URL Available	URL Redirect Ends	Related Feature	Potential Impact
https://epo.mcafee.com	https://epo.trellix.com	October 23, 2022	December 31, 2022	Software Catalog	Unable to download software from the Software Catalog
https://lc.mcafee.com	https://lc.trellix.com	October 23, 2022	October 27, 2025	Repository Pull	Unable to complete a repository pull

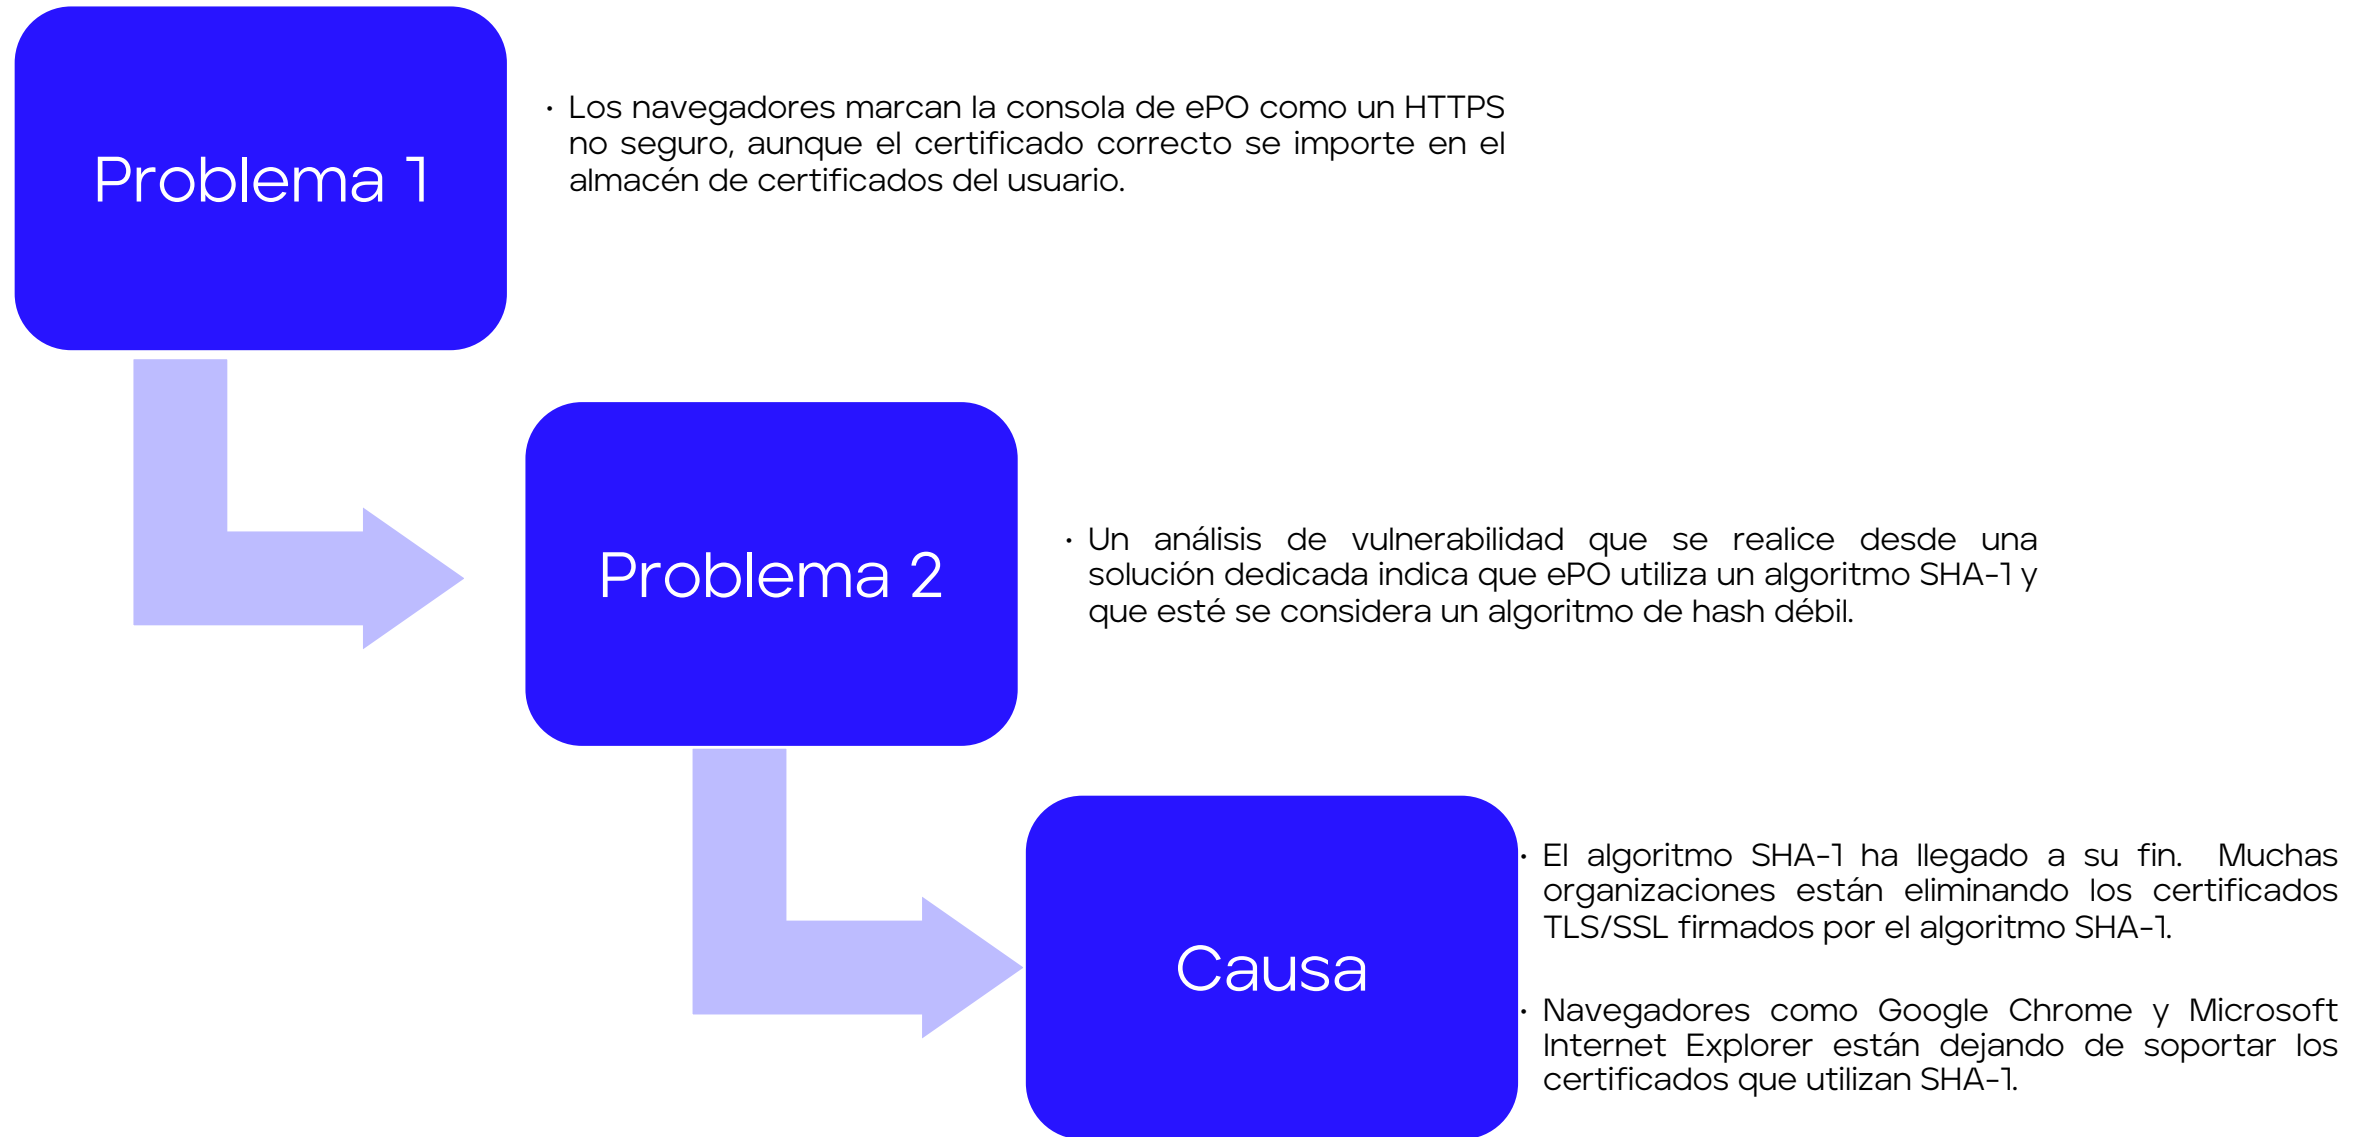

Actualmente, ePO no permite cambiar estas URL. Esto se abordará en la próxima versión de ePO 5.10 Update 14, cuyo lanzamiento está programado provisionalmente para principios de octubre de 2022.

Trellix domain and IP address / range updates

Component or Product Name	Updated Domain or IP Address/Range	Effective Date	Deadline / URL Redirect Ends	Action Required
Cloud Service Status	https://trust.mcafee.com is changing to https://status.trellix.com	September 6, 2022	December 31, 2022	Update your bookmarks to reflect the new site location. Subscribe to receive notifications regarding cloud services outages on the new page.
Community	Updated the Community site (https://community.trellix.com)	Live	TBD	Update your bookmarks to reflect the new site location.
Documentation Portal	Updated to the Trellix domain (https://docs.trellix.com)	Live	TBD	Update your bookmarks to reflect the new site location.
ePO on-premises	https://lc.mcafee.com is changing to https://lc.trellix.com	October 23, 2022	October 27, 2025	See KB95905 - ePolicy Orchestrator URL changes.
ePO on-premises	https://epo.mcafee.com is changing to https://epo.trellix.com	October 23, 2022	December 31, 2022	See KB95905 - ePolicy Orchestrator URL changes.
Reference Configuration Report Finder	https://rcsearch.mcafee.com/ changed to https://rcsearch.trellix.com/	Live	TBD	Update your bookmarks to reflect the new site location.
Support Notification System (SNS)	Updated the SNS subscription site (https://www.trellix.com/en-us/contact-us/sns-preferences.html). Updated the SNS sender domain (noreply@sns.trellix.com) starting June 6, 2022.	Live	TBD	Update your bookmarks to reflect the new site location. IMPORTANT: Add noreply@sns.trellix.com to your Safe Senders list so you continue to receive SNS emails.
Support ServicePortal	Updated to the Trellix domain (https://support.trellix.com)	Live	TBD	Update your bookmarks to reflect the new site location.

C

Migration from SHA-1 to SHA-2 certificates is needed after upgrading to ePolicy Orchestrator

¿Que tengo que cambiar?

Ejemplo – Cambio de Certificados:

- McAfee, Inc. is transforming to Musarubra US, LLC.
- ¿Permite que los certificados raíz e intermedios de terceros se actualicen automáticamente en los sistemas de su entorno?
- No? Despliegue los nuevos certificados raíz e intermedios de terceros que soportan nuestra cadena de certificados de Musarubra US, LLC. en los sistemas que utilizan nuestro nuevo certificado en su entorno
 - Certificate details can be found in [KB95499 - Trellix solutions rebranding](#)

Cuando esté disponible, despliegue la versión de la solución que haya adoptado estos cambios antes del 31 de diciembre de 2022

- **IMPORTANTE: ¡Asegúrese de implementar todos los cambios de Certificados, FQDN, URL e IP antes de adoptar las versiones de la solución que aprovechan estos cambios!**

Trellix certificate updates

Por favor, revise cuidadosamente y tome medidas antes del 31 de diciembre de 2022 para asegurar la funcionalidad continua de la solución. Los certificados SSL / TLS y Code Signing se emiten a nombre de la entidad legal de Trellix, Musarubra US LLC.

Certificate	Purpose	SHA1 Hash (Thumbprint)	Effective Date
CN = MUSARUBRA US LLC O = MUSARUBRA US LLC L = New Castle S = Delaware C = US	Code Signing	41959da7a7c475f7f1e70e5988493955dc613ee7	Products released in H2 2022
CN = MUSARUBRA US LLC O = MUSARUBRA US LLC L = New Castle S = Delaware C = US	Code Signing	d34070c398bf1b3a836e365f80f3b4f869a7c454	Products released in H2 2022
CN = www.trellix.com OU = Engineering O = Musarubra US LLC S = California C = US	SSL / TLS	54086332dc8993b3e79b2649e8230763adacde3f	Currently in use

ePolicy Orchestrator URL changes

Warnings:

Si está en ePO 5.10 Actualización 10 o anterior, no ha realizado la migración SHA y su servidor de ePO sigue utilizando un certificado de 1024 bits, debe completar la migración SHA antes de actualizar a ePO 5.10 Actualización 14. La comunicación agente-servidor falla después de aplicar ePolicy Orchestrator 5.10 Actualización 11.

Si utiliza ePO 5.10 Actualización 10 o anterior, le recomendamos que abra el Administrador de certificados y confirme que su servidor de ePO utiliza claves de 2048 bits. Si no es así, inicie el proceso de migración de certificados inmediatamente para prepararse para el lanzamiento de ePO 5.10 Update 14.

Para comprobar si su servidor de ePO utiliza un certificado de 2048 bits, siga estas instrucciones:

Inicie sesión en la consola de ePO.

Vaya a Menú, Configuración, Administrador de certificados.

Observe el valor del campo Tamaño de la clave tanto para el certificado raíz como para el producto: Agent Handler. Si cualquiera de las dos secciones muestra una clave de 1024 bits, debe migrar los certificados.

Trellix ePolicy Orchestrator 5.10 Update 14 RTS

Contenido:

Esta versión incluye cambios en la marca y soluciona problemas conocidos, como los de consumo de memoria, producto, escáner y estabilidad del instalador.

Nota:

Asegúrese de que los clientes revisan la sección de notas de la versión "Detalles importantes sobre la actualización 14" y las notas de la versión en su totalidad antes de actualizar a la actualización 14.

Nuevas Funciones:

Personalización de la estructura del árbol de sistemas

Actualización de las bibliotecas de terceros para mejorar la seguridad

Se ha actualizado la versión de Apache a 2.4.54

Se ha actualizado la versión de Tomcat a 9.0.64

Actualizada la versión de Open SSL a 1.0.2zf-fips

Actualizada la versión de Java a 1.8.0_341

Activación/desactivación de la expansión automática de los grupos del árbol de Sistemas,

Trellix ePolicy Orchestrator 5.10 Update 14 RTS

Resolved Issues	
Reference	Resolution
EPO-9411	Resolves an issue in displaying the Show related system details from the results of the Applied Client Task query.
EPO-10644	Resolves an incorrect verbiage mapped for Assigned Path in Policy Catalog.
EPO-9643	Resolved an issue where Custom ePO Dashboard loads slowly when there are multiple queries.
EPO-10569	The processing of properties file with more than 3000 characters causes data truncation error in SQL. This is now resolved.
EPO-9744	Resolves an issue in reporting for free disk space other than C drive is not working.
EPO-10687	Resolves an issue where events sent from ePO 5.10 are duplicated in the Syslog server.
EPO-10498	Trellix Agent fails to connect to the Agent handler with 'curl error 7' and Agent handler points to "server is too busy". This is now resolved.
EPO-9976	Audit log entries for Syslog Forward Events does not have complete failure information. This issue is now resolved.
EPO-10613	Automatic Response for Server Events are not triggered after upgrading to Update 13. This issue is now resolved.
EPO-9686	Resolves an issue in removing Agent from Linux systems.
EPO-10492	Resolves an issue where preferred event time does not reflect Time zone preference of user account
EPO-10513	Resolves an issue where system selection wasn't cleared even after the drag and drop is complete.
EPO-10515	Events are being sent to ePO DB without applying the event filter setting. This issue is now resolved.
EPO-10543	Reports does not honor newest first settings set for Queries. This issue is now resolved.
EPO-10557	Resolves an issue where incorrect policy is displayed while editing the Policy Assignment Rule.
EPO-10516	Resolves an issue by displaying older policy on the left side while comparing the policies.
EPO-8953	Resolves an issue where software manager does not reflect the available notification in ePO status updates.
EPO-9243	Non-Admin user getting - missing 'duplicate' button from Actions category of Queries & reports page, observed with EPO 5.10 Update 8 has been now resolved.
EPO-9388	Filter on system tree results in delay drilling down on system details. This is now resolved.
EPO-9543	MDE Event 30030 is visible in UI and routed to Syslog Server. This issue is now resolved.
EPO-9644	Updating ENS v10.7 April 2021 version will update on all branches of Main Repository. This issue is now resolved.
EPO-9774	Resolves an issue of not reporting free disk space except c drive.
EPO-10574	The certification migration process completes even without the server keystoretemp and keystorebackup folder. This is now resolved.
EPO-9919	Issues with 'Edit task on a single system'. This is now resolved.
EPO-10001	Resolves an issue of showing unexpected results in Policy History Comparison.
EPO-10488	Groups queries are visible in Shared group during query selection in the Server task. This issue is now resolved.
EPO-10490	Searching of Threat name does not show any result. This issue has now resolved.
EPO-10581	The ePO server list on the Trellix Agent is rewritten and couldn't connect to the server. This issue is now resolved.
EPO-10648	User created query groups will be removed during install, upgrade or uninstall of extensions. This issue is now resolved.
EPU-443	ePO Cumulative update Roll-Back removes "Short Names" from Files. This is resolved.
EPU-474	Incorrect handling of SQL scripts during repair option. This is resolved now
