Trellix

Portfolio Strategy

Sean Morton
SVP, Products & Engineering

We empower cyber defenders
Defense in breadth
With answers; not alerts
No matter how complex your environment
Wherever you are on your journey

We empower cyber defenders:

Defense in breadth

Unified visibility and protection

- Email Security
- Endpoint Security
- Network Security
- Data Security
- Security Operations

Dynamic attack lifecycle detection

- Pre-execution analysis stops initial compromise
- Cross-correlation provides full-cycle visibility
- Zero-hour content deployment shrinks time-to-protect

Proactive defense and risk mitigation

- Identify the potential, multi-step routes a threat actor could take from initial entry to critical assets
- Move from device-centric controls to managing human-centric risk

Your adoption journey

Trellix

We empower cyber defenders:

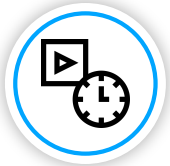
With answers; not alerts

Intuitive design for faster decisions

- GenAI that elevates analysts across various stages of an investigation
- Gain decision advantage via intuitive, role-based workflows
- AI-guided investigations informed by 10+ years of frontline IR experience

Keep pace with the threat space

- Preemptively block threats
- Understand what happened —and what could happen
- Accelerate defense with alerts instantly enriched with actionable, verified context



Adaptive, context-aware response

- Minimize dwell time and reduce errors with automation using codified playbooks, informed by threat intelligence
- Eliminate repetitive, reactive tasks, freeing time for high-impact initiatives

Your adoption journey

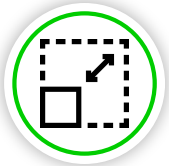
Trellix

We empower cyber defenders:

No matter how complex your environment

Secure complex environments

- Designed for hybrid, architecturally complex environments
- Secure your assets wherever they reside, including public and private cloud, on-premises, and air-gapped environments



Scale confidently

- Trusted worldwide by large, complex enterprises and governments

Bridge the IT/OT gap

- Secure and expand visibility across IT and OT/IOT environments.
- Decades of partnership with industry-leading ICS/OT vendors

Your adoption journey

Trellix

We empower cyber defenders:

Wherever you are on your journey

Optimize current investments

- Have answers at your fingertips via our self-service knowledge base and defender community
- Access best-practices to ensure your deployment delivers maximum value
- Cultivate proficiency via online courses, virtual events, and guided instruction

Trellix Managed Detection & Response

- 24/7 expert-led threat hunting, investigation, and response
- Achieve surgical threat containment through GenAI-boosted investigation and response
- Augment your security team with elite, on-demand threat expertise

Trellix Professional Services

- Drive a resilient security posture that adapts with the threat landscape
- Develop a balanced approach, addressing immediate concerns and long-term goals
- Access customized threat intelligence, tailored to your organization

Your adoption journey

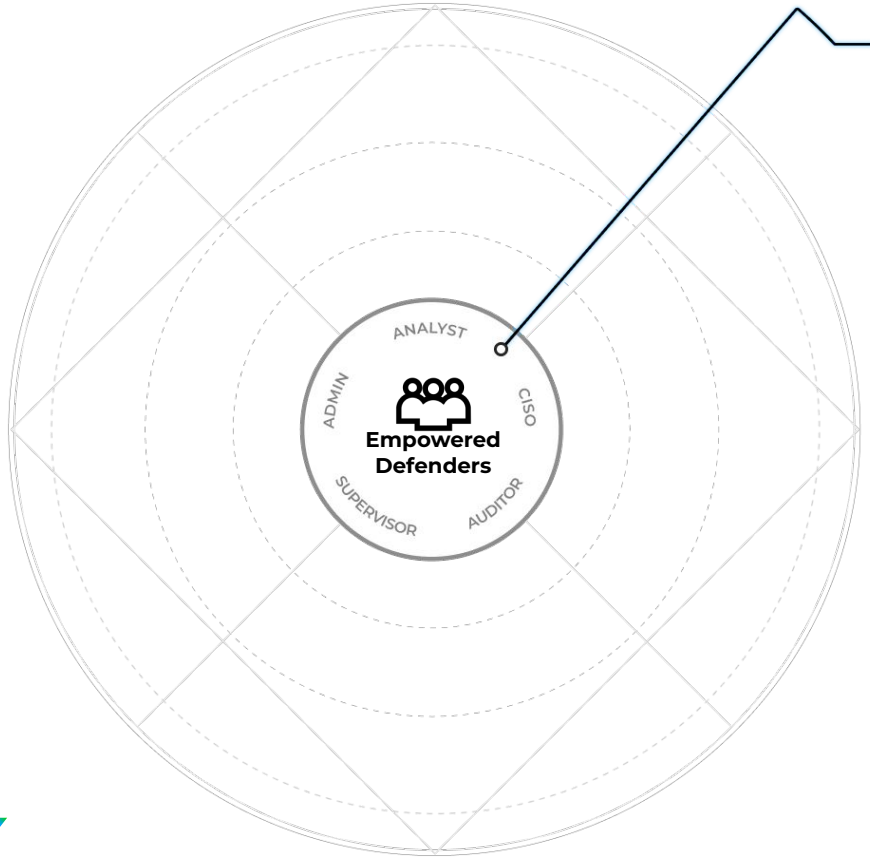
Trellix

WHAT IS A PLATFORM?

An extensible **foundation** upon which applications are **built** and **integrated** to produce impactful security **outcomes**.

Trellix

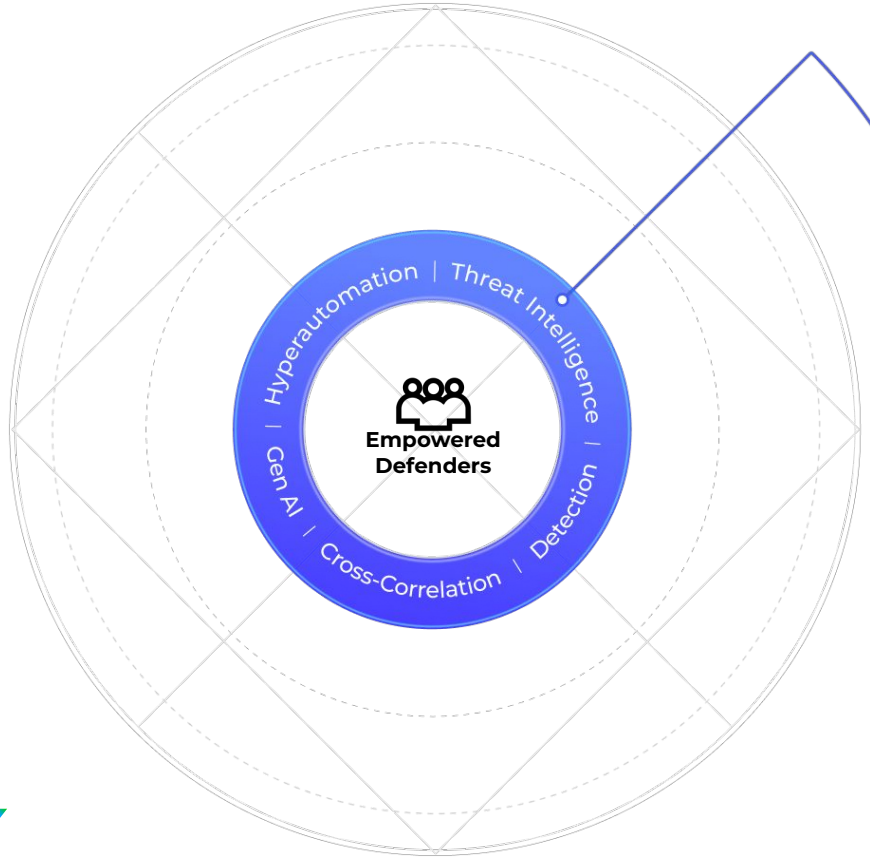
Accelerate defender workflows



1. We empower defenders with **intuitive**, **role-oriented experiences**

Trellix

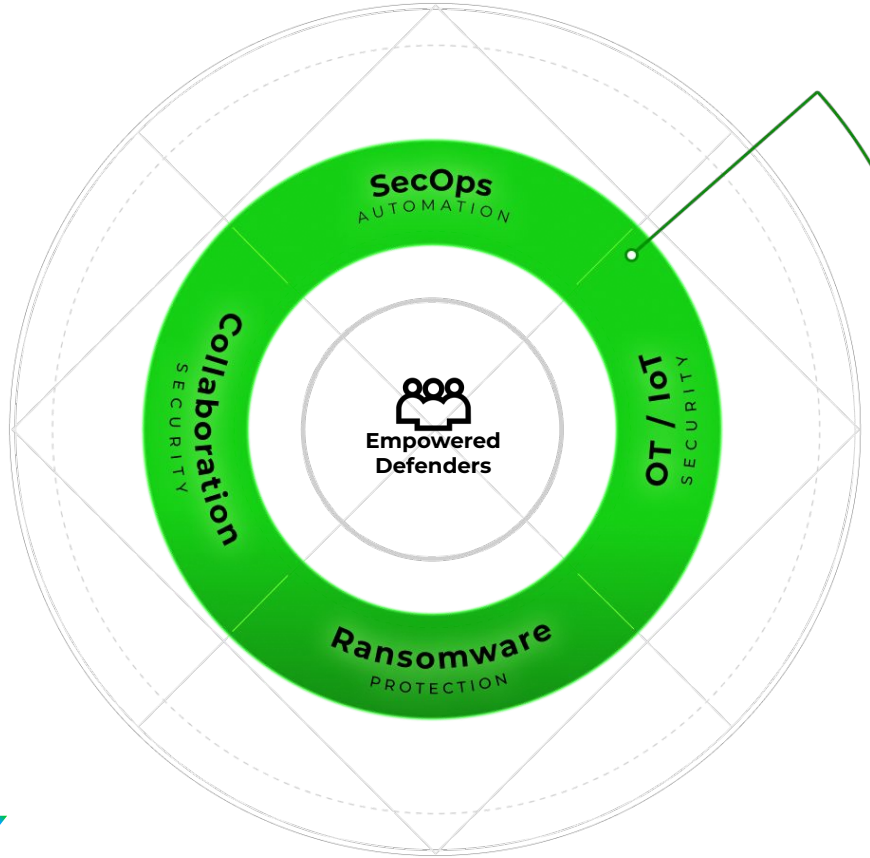
Gain decision advantage



2. With a rich array of **contextual information** that guides response

Trellix

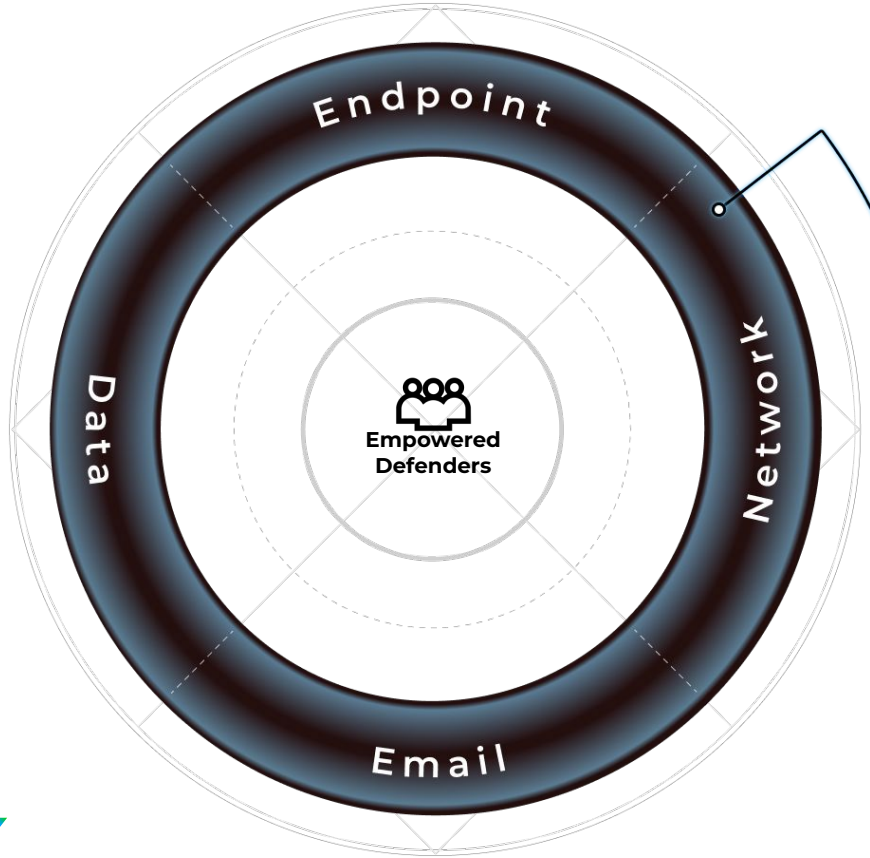
Drive impactful security outcomes



3. Designed to deliver dynamic outcomes in **key solution areas**

Trellix

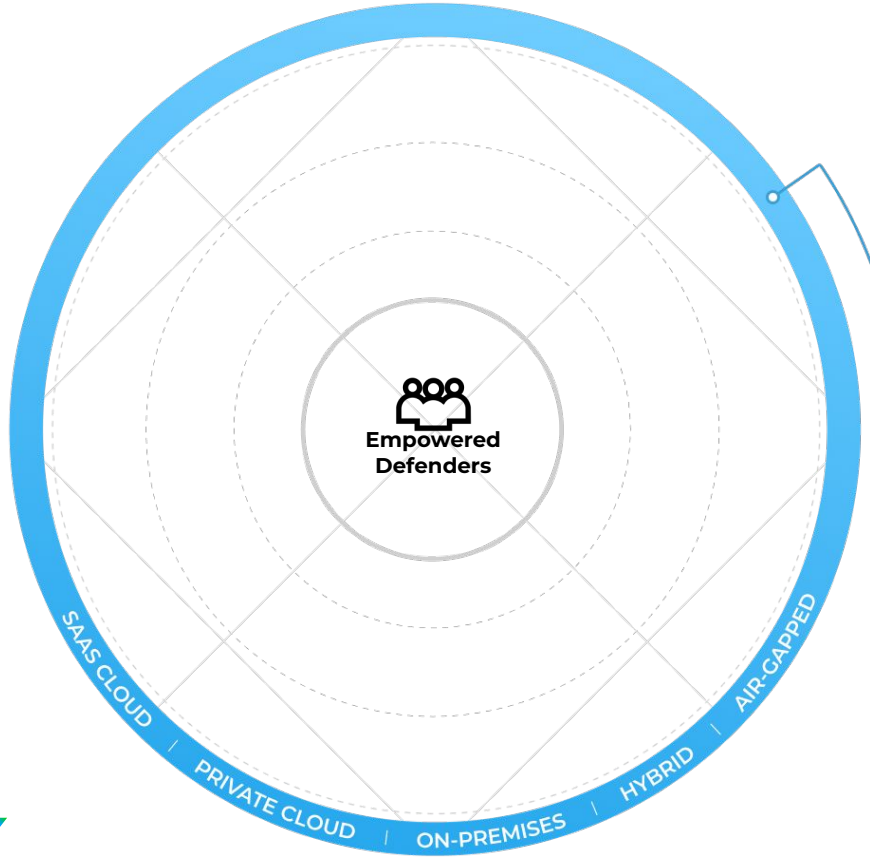
Minimize the attack surface



4. Built on **critical control products** for visibility and protection

Trellix

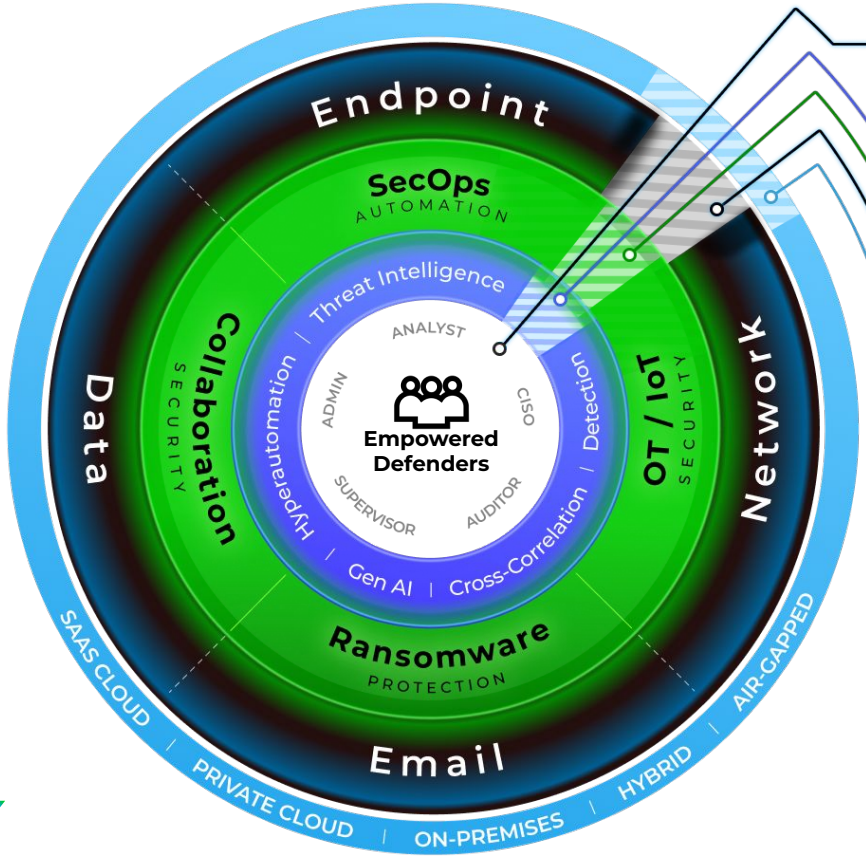
Across sophisticated, hybrid architectures



5. All working in concert, no matter how **complex your environment**

Trellix

The Trellix Security Platform



1. We empower defenders with **intuitive**, **role-oriented experiences**
2. With a rich array of **contextual information** that guides response
3. Designed to deliver dynamic outcomes in **key solution areas**
4. Built on **critical control products** for visibility and protection
5. All working in concert, no matter how **complex your environment**

Trellix

Portfolio Focus

1. Converge our technology stacks with a flexible, hybrid architecture
2. Streamline experiences and unlock platform value across Trellix solutions
3. Strengthen security postures with world-class threat coverage and efficacy
4. Infuse AI and automation innovation to accelerate security teams

Trellix

Endpoint

DONE

Forensics Enhancements

Expanded forensics capabilities and improved detection visibility. EDRF on-prem with Historical Search.

Q1'26

FedRAMP Availability

EDRF FedRAMP support, improved Wise usability, new ML models, and HX migration support.

Q2'26

Cloud Forensics

Native cloud forensics, new advanced detections, and unified agent improvements.

2H'26

Next-Gen Architecture

All new EDRF on-prem scalable architecture with improved UX and detections.

EPO Orchestration | **Unified Agent** | **Hybrid Architecture**

Trellix

Network Detection & Response

DONE

NDR v4.0

Asset discovery, risk profiling, encrypted traffic analysis, DNS anomalies, DGA and credential steal.

DONE

Attack Path Discovery

Integration with Trellix Endpoint and vulnerability tools/data for risk identification and reduction.

Q4'25

NDR v4.1

Extended control to ICS/OT environments, hyperautomation, user anomalies engine, and cloud workloads.

H1'26

Next-Gen NDR Sensor

Consolidated NDR sensor for active control with SSL, 60 Gbps per sensor, stacking to 300 Gbps.

Simplified Integrations | **Hybrid Operations** | **Data Federation**

Trellix

Email & Collaboration

DONE

Email & Collaboration Security

Protect inbound & outbound email, O365, GSuites, and other SaaS platforms, phishing simulation, and WISE AI.

H2'25

Integrated Data Protection

Integrated Cloud DLP for Email & SaaS services, DMARC reporting, and unified XConsole.

H1'26

Human-Centric Visibility & Protection

Account compromise detection, internal email threat protection, and enhanced workflows and dashboards.

2026+

Workspace Security

Human-centric risk detection across email, collaboration, identity, data, endpoint, and network.

A Pathway to Workspace Security

Trellix

Data Security

DONE

ARM Compatible

Single install supports ARM-compatible and x64 architectures for DLP Endpoint (Win).

Q4'25

AI Data Risk

Centralized dashboard to track potential AI data leakage and swiftly resolve threats.

Q4'25

Global Readiness

IPv6 support across major products to empower global security and innovation.

2026+

Enhanced Features

Integrated AI DLP, more cloud database support, and post-quantum cryptography readiness.

Hybrid Environments | **Advanced Threat Defense** | **Consistent Capabilities**

Trellix

Security Operations

DONE

Hyper Automation

Hyperautomation beta, automated workflows directly integrated with analyst experience.

Q4'25

Analyst Experience

Revectored archive search and workflows, GA Hyperautomation, and updated packaging.

Q1'25

Trellix Edge & Analyst Experience

New log collector with filtering and self-service. Compliance & risk reports on existing data sources.

FUTURE

NG-SIEM On-Premises

On-prem next-gen SIEM with converged user experience, including Hyperautomation.

Simplified Integrations | **Hybrid Operations** | **Next-Gen SIEM**
