

Intelligent Sandbox Essentials

Self-Paced Online Training

Highlights

Duration

4-hours

Who Should Attend

This course is intended for system and network administrators, security personnel, and/or consultants concerned with Intelligent Sandbox.

Prerequisites

Students taking this course should have a basic knowledge of network concepts and protocols (TCP/IP), a basic understanding of routing and connecting flow (LAN, WAN, Internet), basic knowledge of Operating Systems (Windows/Linux), and a working knowledge of ePolicy Orchestrator (ePO).

How to Register

This course is available for purchase at <https://trellix-training.netexam.com>

This course provides an overview of Trellix Intelligent Sandbox (IS), its key features, purpose, and benefits. It also provides a high-level overview of installation and configuration along with basic management and troubleshooting guidance.

Learning Objectives

- Describe the IS solution, purpose, key features, and benefits
- Describe the components required to deploy IS
- Install and configure IS
- Explain the steps to create VMs
- Describe malware analysis workflow in IS
- Identify resources and tools useful for basic management and troubleshooting in IS

Agenda at a Glance

1. Introduction
2. Product Overview
3. Installation
4. Configuration
5. Management and Troubleshooting
6. Conclusion
