

Application and Change Control Essentials

Self-Paced Online Training

Highlights

Duration

6-hours

Who Should Attend

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with network and system security.

Prerequisites

Students taking this course should have a working knowledge of Microsoft Windows, System Administration, and Network Technologies. Students should also have prior experience using Trellix ePolicy Orchestrator (ePO).

How to Register

This course is available for purchase at <https://trellix-training.netexam.com>

This course introduces the basic uses, architecture, configuration, maintenance and troubleshooting techniques available for Trellix Application Control and Change Control (ACC). Additionally, the resources and videos available in the course are packaged for use individually so they can be referenced later.

Learning Objectives

- Describe Trellix Application and Change Control solutions.
- Plan Application and Change Control deployment.
- Install and Configure Application and Change Control.
- Create Policies and Rules.
- Design the Application Control Trust Model
- Enable and Configure Change Control.
- Configure Integrity Monitoring policies.
- Describe Inventory mode.
- Describe Common Platform Enumeration (CPE).
- Describe Trusted local group.
