

Drive Encryption Essentials

Education Services eLearning course

Introduction

The Drive Encryption Essentials course from Education Services provides attendees with interactive training on the design, setup, configuration, and management of encryption software. In addition, students will understand how to effectively implement the software in a complex enterprise.

Course Goals

- Analyze the impact of Drive Encryption on a security environment.
- Install Drive Encryption.
- Analyze an environment for installation blockers.
- Configure policies and deploy using the Trellix Agent.
- Evaluate the requirement to protect against cold boot attacks using Drive Encryption.

DATASHEET

Audience

Security management professionals responsible for the deployment and/or management of the products. System and network administrators, security personnel, auditors, and/or consultants concerned with network and system security should take this eLearning.

Recommended Pre-Work

It is recommended that students review the Drive Encryption Product Documentation. This training is intended to supplement the documentation and not replace it.

- Analyze the impact of policy changes in a Drive Encryption environment.
- Perform various methods of user self-recovery.
- Perform basic troubleshooting of Drive Encryption.

Agenda At A Glance

2 hours

This course has the following modules. Each module is a combination of instructional material, videos, and links. Please complete each module. Also refer to all the documentation of this product. (Installation Guide and Product Guide from Product Documentation Portal).

- Course Introduction
- Product Overview
- Installation
- Configuration
- Product Management
- Recovery
- Troubleshooting
- Summary
