

MVISION Data Loss Prevention Essentials

Education Services eLearning course

Introduction

The purpose of this course is to introduce the basic features, functionality, architecture, installation process, configuration settings, and troubleshooting tools available for Data Loss Prevention Endpoint for use with MVISION ePO. Additionally, the resources and videos available in the course are packaged for individual use so that can be referenced later.

Course Goals

- Describe the solution, key features, functionality, and architecture.
- Install and configure MVISION Data Loss Prevention.
- Manage user roles and permissions, policies and rules, to track and control sensitive information.
- Gather and analyze evidence and events.

DATASHEET

Audience

System and network administrators, security personnel, auditors, and/ or consultants concerned with network and system security should take this course.

Recommended Pre-Work

It is recommended that students have a working knowledge of Microsoft Windows administration, networking, system administration, security, working knowledge of Data Loss Prevention Endpoint and MVISION ePolicy Orchestrator, and a general understanding of internet services.

- Create and interpret reports to monitor incidents, events, and system health.
- Learn about troubleshooting tools and how to use them.
