Trellix

Trellix Drive Encryption Essentials Course
Education Services eLearning course

Highlights

Duration

4-hours

Audience

Security management professionals responsible for the deployment and/or management of the products. System and network administrators, security personnel, auditors, and/or consultants concerned with network and system security should take this eLearning.

Recommended Pre-Work

It is recommended that students have a working knowledge of Microsoft Windows administration, system administration concepts, a basic understanding of computer security concepts, and a general understanding of internet services. It is also necessary to have prior experience using Windows CLI commands and Trellix ePolicy Orchestrator.

Learn More

To order, or for further information, please email SecurityEducation@trellix.com

The Drive Encryption Essentials course from Education Services provides attendees with interactive training on the design, setup, configuration, and management of encryption software. In addition, students will understand how to effectively implement the software in a complex enterprise.

Learning Objectives

- Analyze the impact of Drive Encryption on a security environment.
- Install Drive Encryption
- Analyze an Environment for Installation Blockers
- Configure policies and deploy Drive Encryption software using Trellix Agent
- Evaluate the requirement to protect against cold boot attacks using Drive Encryption
- Perform Recovery with Drive Encryption

Agenda at a Glance

- Module 1: Course Introduction Install Drive Encryption
- Module 2: Product Overview
- Module 3: Installation
- Module 4: Configuration
- Module 5: Product Management
- Module 6: Recovery
- Module 7: DETech Tool
- Module 8: Troubleshooting
- Module 9: Summary
