

Trellix ePolicy Orchestrator (ePO)

A centralized security management platform that helps orchestrate and manage your endpoints, from a single console.

1. Extensible

- Grow above and beyond
- Benefit from the wide range of features available, today and with time to come

2. Instantaneous

- Leverage integrated Threat Intelligence Exchange (TIE) and Intelligent Sandbox (IS)
- Oversee protection compliance in real-time

3. Automated

- Deploy, control, and upgrade your devices via the cloud
- Benefit from a single-pane-of-glass view

4. Centralized

- Manage all your devices and diverse platforms
- And manage them from anywhere across the world and geographies

5. Customizable

- Tailor-built-per-user dashboards and granular policies with similar look and feel, across the board
- Enjoy the power of the platform

6. Apt

- Build your own security posture
- Leverage Trellix ePO and Trellix API to add your own personal touch and enhance your security infrastructure

7. Trim

- Eliminate datacenter hardware and licensing requirements
- Invest the dollars saved in expanding your security posture

8. Augmented*

- Takes 0 minutes to manage behind-the-scenes infrastructure and related updates
- Let us take care of these, for you

9. Certified

- Federal Risk and Authorization Management Program (FedRAMP)* and Federal Information Processing Standard (FIPS)^ certified
- Benefit from Trellix ePO's approved information security and management

Trellix ePolicy Orchestrator (ePO) is available in three variants: Trellix ePO - SaaS, Trellix ePO - IaaS and Trellix ePO - On-prem
