**NOTE:**

1. For more information on the deprecation of applicable signatures, see: [KB94952 - List of obsolete signatures deprecated from Exploit Prevention and Host Intrusion Prevention as of June 2022 content.](#)
2. For more information on the default Reaction-type associated with Signature severity levels for all supported product versions, see: [KB90369 – Exploit Prevention actions based on signature severity level.](#)
3. Trellix maintains additional Expert Rules for use in Trellix Endpoint Security's Exploit Prevention policy that can provide increased coverage for more specific requirements. For more information, see [Trellix ExpertRules GitHub Repository.](#)  
**IMPORTANT:** Trellix recommends testing Expert Rules in a non-production test environment to ensure rule integrity, and to prevent conflicts with unique environment configurations. Customers should exercise caution when deploying Expert Rules in their environment.
4. Expert Rules are not available by default with the Content, customers need to configure and deploy the rules according to their requirements.

## HOW TO UPDATE

Please find below the KB article reference on how to update the content for following products:

1. Trellix Endpoint Security Exploit Prevention:

[KB92136 – Exploit Prevention signature content updates and remediation rollback version for troubleshooting.](#)

2. Trellix Host Intrusion Prevention:

[KB53092 – Information about Host IPS signature content updates](#)
