

What’s the real cost of a security breach?

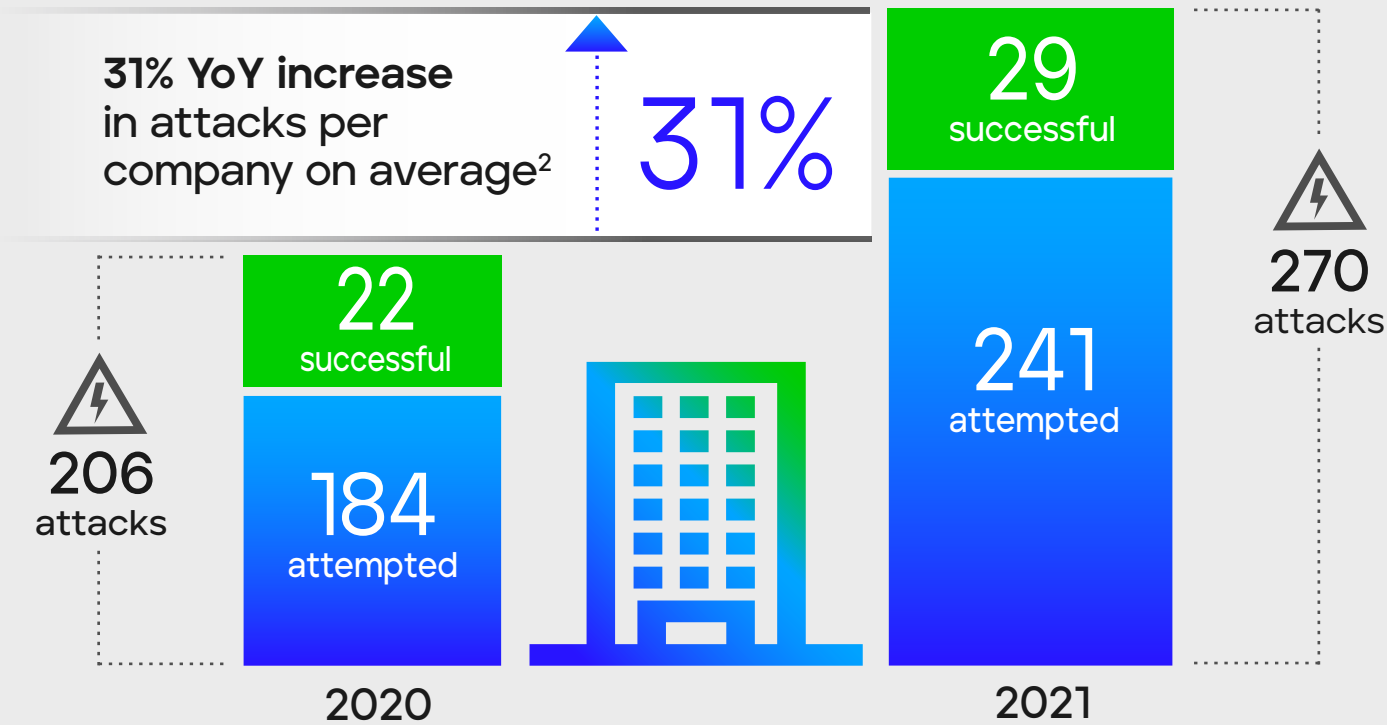

The impact is more than just financial

270

There were on average **270 attacks** per company in 2021¹

\$4.24M

is the average cost of a breach³

Organizations lose more than money in a data breach

- Loss of productivity
- Downtime
- Lost sales
- Compromised data
- Tarnished brand
- Legal exposure

Today’s security threats are more sophisticated and costly than ever, and yesterday’s static, siloed security solutions aren’t enough to keep up.

Trellix provides you with a living, learning security ecosystem that constantly adapts to keep your organization resilient and secure.
